

## Success Story

Transforming, nothing short of transforming! The difference in my son is amazing. School was such a struggle, tutors, homework horrors, life was hard! We had done some eye therapy in the past without much success.

We knew some of the old problems persisted so @ ~~15~~ years old we revisited the visual therapy arena. Dr Mattson let me sit in on the evaluation - I was certain there was some kind of trick or illusion. It was clear to me my son & I actually saw differently.

We made the leap back into therapy with faith things would work more effectively now. The change - night & day - Now he makes A's & B's with very little effort. He reads. He reads study material because it is fast, easy, makes sense and he comprehends what he reads. He is happy and fun. My deepest thanks - Amber
