

Success Story

The change has been amazing! When Kennedy began vision therapy she dreaded school and avoided being called on in class. Her difficulties in reading had destroyed her self confidence and turned a bright outgoing child into a shy withdrawn student.

Since beginning vision therapy her ability to read has gradually increased to beyond her grade level. She now looks forward to school, raises her hand to answer questions in class and is now the same bright outgoing child in school and out.

She has done better than we ever imagined.

Thank you so much!
Scott, Shannon & Kennedy
