

Success Story

Although Stacie was reading at 3rd grade level, she was experiencing headaches and fatigue. She had always loved to read, but she was starting to avoid reading on her own.

After vision therapy, Stacie has had a wonderful school year. She is no longer fatigued, and she has not had any headaches. She loves to read any chapter book.

Before she started school, Stacie was very creative. She loved to make up stories. Before she started vision therapy, she had stopped telling stories. Now, she is writing detective stories. She loves to draw now. Her handwriting has also improved.

Thank you, Dr. Phil and Dr. Shannon! Working with you has improved Stacie's quality of life.
